What this standard covers

This standard specifies the terms and definitions, technical requirements, test methods, reliability tests, inspection rules, marking, packaging, transportation and storage requirements for a 2 x 25 Gb/s dual channel optical transceiver module. This standard is applicable to the optical transceiver module with QSFP encapsulation mode, the rate of each channel is 25.78125Gb/s, two single-fiber bidirectional optical components, and the two internal transmission wavelengths and receiving wavelengths are the same.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 21,290 words.
