What this standard covers

This standard specifies the classification system for various types of applications provided on domestic mobile communication networks and various types of broadband networks, and the definition of basic indicators used to evaluate the degree of development of these applications. This standard is applicable to domestic communication authorities or relevant management units in the planning, management, and statistics of various network applications, classifying applications, and quantitatively evaluating macro development; domestic network operators, application service providers, and application development. The unit evaluates the development during the application delivery process. Domestic scientific research institutions, other enterprises and institutions or institutions may refer to use.
