What this standard covers

This standard specifies the interface technical requirements, functional requirements, functional analysis, data requirements, and communication protocols of the 2 GHz WCDMA digital cellular mobile communication network digital repeater equipment incorporated into the repeater monitoring system. This standard is applicable to wireless repeaters, fiber optic repeaters, wireless relay repeaters, and optical fiber relays in various digital repeaters of 2GHz WCDMA digital cellular mobile communication networks that need to be included in the repeater monitoring and management system. Put the station and so on. Digital repeaters operating in other frequency bands can also be used as reference.
