What this standard covers

This standard specifies the product classification, requirements, test methods, inspection rules, packaging, marking, transportation and storage of integrated cables for data transmission at 10 Gbps and below. This standard is applicable to data transmission and power supply cables for communication equipment and electronic terminals. The differential impedance of the data line is 90°, the transmission frequency is up to 15GHz, and the maximum transmission rate is 10 Gbps.

Document data

Chinese classification (CCS): M42.
