What this standard covers

This standard specifies the network interworking technical requirements for packet enhanced optical transport networks, including network interworking models and interworking technology interfaces, services, operational management and maintenance (OAM), protection, quality of service (QoS), synchronization, etc. . This standard applies to interworking between packet enhanced optical transport network networks and with other transport networks or router networks.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 30,387 words.
