What this standard covers

This standard specifies the model name, requirements, test methods, inspection rules, marking, packaging, transportation, storage, etc. of the valve-regulated sealed lead-carbon battery for communication. This standard is applicable to communication base stations with frequent charge and discharge, core equipment rooms with peak-shaving and valley filling functions, and valve-regulated sealed lead-carbon batteries for data centers.

Document data

Chinese classification (CCS): M41.

Estimated length of the Chinese original: 24,296 words.
