What this standard covers

This standard specifies the transmission capability, service capability, basic protocol function, radio frequency, power consumption, interface, security and other requirements of 5G enhanced mobile broadband terminal equipment in the frequency band below 6GHz. This document applies to 5G terminals for non-standalone and standalone networking in the frequency band below 6GHz that support enhanced mobile broadband scenarios (eMBB).

Document data

International classification (ICS): 33.070.50.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 122,112 words.

Supersedes the earlier edition YD/T 3627-2019.
