1 Foreword

YD/T 3643-2020 is issued by Ministry of Industry and Information Technology.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 40 pages in English translation.

2 Scope Preview

This standard specifies the functional requirements, data communication requirements and data exchange format of the interface between the information security management system related to Internet domain name services and the information security management system authorized by the telecommunications management department in accordance with national laws and regulations. This standard is applicable to businesses constructed by relevant organizations engaged in Internet domain name services, including but not limited to domain name root server (including mirror server) operating agencies, domain name registration management agencies, domain name registration service agencies, domain name authoritative resolution agencies, and domain name recursive resolution agencies. Information Security Management System.

YD/T 3643-2020 falls under ICS 33.060, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.
