What this standard covers

This standard specifies the principles and security protection requirements that telecommunications data processors should follow in conducting data processing activities in the telecommunications field, including basic data security protection requirements such as organizational safeguards, data classification and grading, and access control, as well as data lifecycle security protection requirements. This standard applies to telecommunications data processors conducting data security protection in the telecommunications field. This standard does not apply to the security protection of data involving military, government, or state secret information.

Document data

International classification (ICS): 33.040.

Chinese classification (CCS): M10.

Supersedes the earlier edition YD/T 3802-2020.
