What this standard covers

This standard specifies the terms, definitions and abbreviations of 400Gb/s integrated coherent transceiver optical components; specifies the technical requirements such as photoelectric performance, terminal arrangement, and environmental compliance; describes the corresponding test methods, reliability tests, inspection rules, Marking, packaging, transportation and storage, etc. This document is applicable to the design, development, production and inspection of 400Gb/s integrated coherent transceiver optical components.

Document data

International classification (ICS): 33.180.01.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 29,297 words.
