1 Foreword

YD/T 3856-2021 is issued by Ministry of Industry and Information Technology.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the interface test method between the cluster core network equipment of the Broadband Trunking Communication (B-TrunC) system (second phase) based on LTE technology, including test content and test configuration, Tc1 interface test method, Tc2 interface test method, And S6a, S5/S8, S10 interface test methods. This standard applies to broadband trunking communication (B-TrunC) system (second phase) cluster core network equipment based on LTE technology.

YD/T 3856-2021 falls under ICS 33.060.99, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.
