What this standard covers

This standard specifies the technical requirements for the related equipment of the dedicated core network (DCN) of the LTE digital cellular mobile communication network, including the new technical function requirements of the terminal, base station, MME, HSS and other network elements relative to the LTE network functions and interfaces. Including the DCN-related functional requirements that have no impact on the terminal, and the UE-assisted DCN selection related functional requirements that have an impact on the terminal. This standard applies to terminals, base stations, MMEs, and HSS equipment that support DCN.
