What this standard covers

This standard specifies the registration and management of domain names between the TMCH (domain name trademark protection) service provider and the domain name registry, and between the TMCH service provider and the domain name registrar during the sunrise period and the trademark right declaration period of the new gTLD. technical requirements, service architecture and interface specifications. This standard applies to the establishment of a new gTLD system that complies with both ICANN technical specifications and the Ministry of Industry and Information Technology's domain name management measures.
