What this standard covers

This standard specifies the test requirements for the appearance and structure, power supply and distribution, cooling, structure, integrated wiring, management and control and other subsystems and the overall project of the micro-modular data center. This standard is applicable to guide the standardized design and production of micro-modular data center products, realize the rapid, standard, efficient, modular construction method and standardized testing and acceptance of data centers, and ensure the safety, stability, and safety of micro-modular data centers and data center parks. Operates reliably.
