What this standard covers

This standard specifies the overall technical requirements for 5G messages, including business overview, system architecture, functional requirements, interworking requirements, support management requirements, service quality, terminal requirements and security requirements. 5G messages are implemented based on GSMA RCS UP2.4 and related standards, and are not limited to 5G cellular network implementation. Services include personal messages, industry messages, and messages related to enhanced calls. This standard applies to 5G messaging services and equipment supporting 5G messaging services.
