What this standard covers

This standard specifies the technical requirements for the line-side 100Gb/s optical transceiver module for metro applications, including optoelectronic characteristics, external dimensions, functional requirements, software, environmental compliance, etc., and describes the corresponding test methods, reliability tests, Electromagnetic compatibility test, inspection rules, marking, packaging, transportation and storage requirements. This standard applies to the design, development, production and testing of 100Gb/s optical modules on the line side of metro applications.
