What this standard covers

This standard specifies the equipment test specifications for high-performance Ethernet lossless networks in data centers, including switch function test, switch basic performance test, lossless network RoCE performance test, lossless network application scenario performance test, network card test, lossless network reliability test, etc. This standard is applicable to the R&D, manufacturing and deployment of RoCE-based high-speed Ethernet lossless network equipment, as well as the construction of high-speed Ethernet lossless network data centers.
