What this standard covers

This standard specifies the definition, scope, basic architecture and representation of the information model of the Internet of Things. This standard does not target the specific industries and professions of the Internet of Things. It is not only suitable for the application of various scenarios in the fire protection, home furnishing, environmental protection and other industries of the Internet of Things, but also for the design, deployment and implementation of the Internet of Things platform, network, and security.

Document data

Estimated length of the Chinese original: 16,151 words.
