What this standard covers

This standard specifies the reliability requirements for 5G general module temperature and humidity reliability, dust mist reliability, mechanical reliability and electrical reliability for industry terminals, as well as the test methods for the above reliability requirements, and is aimed at consumer, industrial The corresponding technical requirements are defined for different applications of the category and the vehicle specification category. This standard applies to cellular network 5G general-purpose modules, industrial communication terminals and other equipment for consumer, industrial and automotive applications.
