What this standard covers

This standard specifies the technical requirements for centralized CGN (C-CGN) to back up distributed CGN (D-CGN), and specifies the equipment and systems supporting CGN centralized backup such as BNG, centralized CGN, distributed CGN, log server, and AAA. Related functional and performance requirements. This standard applies to the application environment of next-generation Internet transition technologies such as NAT444, which uses centralized CGN to back up distributed CGN.
