What this standard covers

This standard specifies the technical requirements for network intercommunication during number portability transfer, including technical requirements for number portability transfer network database, number transmission requirements between network number portability transfer networks, and business processes for voice/point-to-point short message/point-to-point multimedia message/non-point-to-point message. This standard applies to the inter-network intercommunication of the number portability service. The technical solutions in the network of each operator are not within the scope of this standard. The gateway offices involved in the business process include traditional circuit domain gateway offices and IMS interworking gateway offices.
