What this standard covers

This standard specifies the data technical requirements for the construction of Internet routing registries in my country, including registration data specifications such as contact information, routing information, autonomous domain information, and collective information. This standard applies to all operating entities with independent public autonomous domain networks, and regulates the data requirements for the corresponding operating entities to register Internet routes in the Internet route registry in my country. The required fields of all required forms to be filled in according to this standard are required to be dynamically updated according to the actual situation to maintain the consistency of the registration data and the actual operation data.
