1 Foreword

YD/T 4208-2023 was issued by Ministry of Industry and Information Technology on 28 July 2023 and has been in force since 1 November 2023.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the capability requirements for cloud computing-oriented security operations centers, which are divided into three parts: security operation center technology platform capability requirements, operational process control capability requirements, and personnel service capability requirements. Computing security operations center capabilities are standardized. This standard is applicable to the development, design and construction of security operation centers by cloud service vendors and security vendors in public cloud, private cloud, hybrid cloud and other scenarios. It can also provide information for third-party organizations to review and evaluate the capabilities of security operation centers for cloud computing. in accordance with.

YD/T 4208-2023 falls under ICS 35.240, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.
