1 Foreword

YD/T 4211-2023 was issued by Ministry of Industry and Information Technology on 21 April 2023 and has been in force since 1 August 2023.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies privacy leakage risk protection indicators for public telecommunications networks and Internet-related domain name services. It is used to evaluate the effectiveness and usability of existing domain name service privacy protection technologies, and at the same time provides a basis for the development and development of new domain name service privacy protection technologies. The design provides necessary guidance and reference for the domain name services involved, including authoritative domain name services and recursive domain name services. This standard applies to Internet domain name service organizations and provides corresponding reference for their domain name service privacy leakage risk protection work.

YD/T 4211-2023 falls under ICS 35.100.70, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.
