## 1 Foreword

YD/T 4403-2023 was issued by Ministry of Industry and Information Technology on 20 December 2023 and has been in force since 1 April 2024.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

## 2 Scope Preview

This standard stipulates the specifications that open source projects need to follow in six aspects: license compliance, software security, software activity, technology maturity, service support and software compatibility. This standard is suitable for open source project sponsors to evaluate the standardization, security, compatibility, activity, maturity, and support of the project, to help them standardize open source project management, and to provide a reference for selection of open source project users.

YD/T 4403-2023 falls under ICS 35.240, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

## 3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

## 4 Related standards

Standards on related subjects:

GB/T 25000.51-2016 - Systems and software engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- Part 51: Requirements for quality of Ready to Use Software Product (RUSP) and instructions for testing

GB/T 20918-2007 - Information technology - Software life cycle processes - Risk management

GB/T 11457-2006 - Information technology Software engineering terminology

YD/T 6682-2026 - 5G MEC edge cloud platform capability requirements

YD/T 4407-2023 - Cloud Service Provider User Data Processing Contract Reference Framework

YD/T 4399.3-2023 - General technical capability requirements for distributed application architecture - Part 3: Cloud native database

## 5 Classification and status

International classification (ICS): 35.240

Chinese Standard Classification (CCS): L 77

Prefix YD/T: recommended standard.
