1 Foreword

YD/T 4670-2024 was issued by Ministry of Industry and Information Technology on 29 March 2024 and has been in force since 1 July 2024.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the overall architecture applicable to the deployment of edge computing in the industrial Internet scenario, including the various modules in the overall architecture and the corresponding requirements. This standard applies to the research and development, construction and deployment of industrial Internet edge computing systems. Other similar industrial Internet edge computing systems can be used for reference.

YD/T 4670-2024 falls under ICS 35.240.50, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

YD/T 3710-2020 - Test methods of message layer of LTE-based vehicular communication

YD/T 3937-2026 - User-plane-based A-BDS positioning technology requirements and testing methods for the Internet of Things (IoT)

YD/T 2879-2026 - Synchronization OAM technical requirements based on packet network

YD/T 4671-2024 - Technical requirements for centralized network configuration of industrial Internet time-sensitive networks

5 Classification and status

International classification (ICS): 35.240.50

Chinese Standard Classification (CCS): M 30

Prefix YD/T: recommended standard.
