1 Foreword

YD/T 4688-2024 was issued by Ministry of Industry and Information Technology on 29 March 2024 and has been in force since 1 July 2024.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the technical requirements for the retention of access logs provided by domestic basic telecommunications enterprises for public users to access the Internet through the 5G network non-standalone networking (NSA) mode, mainly including log retention content, query methods, performance requirements and security and confidentiality requirements. This standard applies to the retention of access logs provided by domestic basic telecommunications enterprises for public users to access the Internet under the 5G network non-standalone networking (NSA) mode.

YD/T 4688-2024 falls under ICS 35.02, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

GB/T 36073-2018 - Data management capability maturity assessment mode

YD/T 4689-2024 - Technical requirements for log retention in 5G standalone (SA) networks

YD/T 4687-2024 - Content delivery network technology requires log retention

YD/T 4686-2024 - Technical requirements for IoT card log retention

5 Classification and status

International classification (ICS): 35.02

Chinese Standard Classification (CCS): L 67

Prefix YD/T: recommended standard.
