1 Foreword

YD/T 4785.4-2024 was issued by Ministry of Industry and Information Technology on 5 July 2024 and has been in force since 1 October 2024.

It is one of 5 parts of the YD/T 4785 series.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the technical requirements for the extension of the BGP SRv6 Policy protocol in the segment routing (SRv6) network control plane technology based on the IPv6 data plane, including the new sub-address family identifier (SAFI) type used to describe SRv6 Policy information, the new NLRI type and related attributes, etc. This standard is applicable to the scenario where the BGP protocol is used to distribute SRv6 Policy path information in the SRv6 network, and is also applicable to the development and testing of network equipment technology and controllers that support SRv6.

YD/T 4785.4-2024 falls under ICS 33.040.40, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.
