1 Foreword

YD/T 4837-2024 was issued by Ministry of Industry and Information Technology on 5 July 2024 and has been in force since 1 October 2024.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the technical requirements for the classification and evaluation of the intelligent level of mobile communication network management and operation, and specifies the methods and technical requirements that can be used to quantitatively evaluate the intelligent level of mobile communication network management and operation, including the overall methods and technical requirements for the classification and evaluation of the intelligent level of mobile communication network management and operation, as well as the evaluation methods and technical requirements by scenario. This standard applies to the qualitative and quantitative evaluation of the classification of the intelligent level of mobile communication network management and operation.

YD/T 4837-2024 falls under ICS 33.040, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.
