1 Foreword

YD/T 4898-2024 was issued by Ministry of Industry and Information Technology on 5 July 2024 and has been in force since 1 October 2024.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the basic specifications and requirements for the transmission of medical business data between business information systems of intelligent and rapid deployment hospitals and between systems and terminals, edge clouds, and cloud computing services. This standard is applicable to data transmission within hospital business information systems built using various intelligent and rapid deployment technologies such as 5G networks and cloud computing access, including but not limited to various hospital business information systems such as hospital information management systems, electronic medical record systems, medical image storage and archiving systems, telemedicine systems, and remote monitoring systems.

YD/T 4898-2024 falls under ICS 33.060, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.
