1 Foreword

YD/T 4970-2024 was issued by Ministry of Industry and Information Technology on 5 July 2024 and has been in force since 1 October 2024.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the technical requirements for IoT security services based on SIM cards, including functional definition, system architecture design and technical process definition of IoT security services based on SIM cards, involving technical requirements for IoT cards, IoT terminals, IoT platforms and other units. This standard applies to the security system design of 2/3/4/5G and NB-IoT terminals.

YD/T 4970-2024 falls under ICS 35.030, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

GM/T 0130-2023 - Certificateless and implicit-certificate-based public key mechanisms based on the SM2 algorithms

GA/T 1389-2017 - Information Security Technology - Guidelines for Grading of Classified Protection of Cyber Security

YD/T 6818-2026 - Security protection and testing specification of on-board pluggable networking devices

YD/T 6816-2026 - Guidelines for internet of vehicles supply chain cybersecurity risk management

YD/T 6661-2026 - Security architecture of data sharing management based on the distributed ledger technology

5 Classification and status

International classification (ICS): 35.030

Chinese Standard Classification (CCS): L 80

Prefix YD/T: recommended standard.
