1 Foreword

YD/T 4984-2024 was issued by Ministry of Industry and Information Technology on 24 October 2024 and has been in force since 1 February 2025.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the robustness test method for digital watermarking technology or products for unstructured data in telecommunications networks and the Internet. This standard applies to the security development, security testing, and security application of digital watermarking technology or products for unstructured data in telecommunications networks and the Internet, and is also applicable to guiding users of digital watermarking for unstructured data in telecommunications networks and the Internet or third-party evaluation agencies to conduct robustness testing and evaluation of digital watermarking technology or products.

YD/T 4984-2024 falls under ICS 35.030, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

YD/T 3746-2020 - Specification of internet of vehicle information service - User personal information protection

GB/T 28826.2-2020 - Information technology-Common biometric exchange formats framework-Part 2:Procedures for the operation of the biometric registration authority

GB/T 31071-2014 - General science and technology infrastructure-Principles and methods for conformance testing

YD/T 4985-2024 - Technical requirements and test methods for image tampering detection in telecommunication networks and the Internet

YD/T 4979-2024 - Technical requirements for industrial Internet time series data security gateway

YD/T 4975-2024 - Technical requirements for industrial Internet security isolation and information exchange systems

5 Classification and status

International classification (ICS): 35.030

Chinese Standard Classification (CCS): L 70

Prefix YD/T: recommended standard.
