What this standard covers

This standard applies to the same telecommunications business operators to build a new digital cellular mobile communication network 900/1800MHz TDMA engineering design (including GSM, GPRS, EDGE network), expansion, alteration engineering design in full consideration of the characteristics of the original equipment, rational use of existing facilities On the basis of reference to the implementation of this standard. Refer to YD/T 5142-2005 "Design Code for Mobile Intelligent Network Engineering" for engineering design involving intelligent network parts.

Document data

International classification (ICS): 33.

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 111,165 words.

Supersedes the earlier edition YD/T 5104-2005.
