What this standard covers

This standard specifies the installation and design requirements for mobile communication emergency vehicle-mounted system engineering. This standard applies to the installation and design of public mobile communication network emergency vehicle-mounted system engineering, including large, medium, and small mobile communication emergency vehicles. The installation design of emergency vehicle-mounted systems for dedicated communication networks in industry applications can be referenced.

Document data

International classification (ICS): 33.020.

Chinese classification (CCS): M04.

Supersedes the earlier edition YD/T 5114-2015.
