What this standard covers

This standard applies to the design and acceptance of intelligent network system engineering. The main contents include: the position of the intelligent network in the fixed-mobile converged network architecture, the interface and functional requirements, the technical requirements of the node setting plan, the network organization plan, the equipment configuration plan, etc., the acceptance indicators of the intelligent network system engineering, the acceptance test method and acceptance Process and other technical requirements.

Document data

International classification (ICS): 33.020.

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 70,791 words.

Supersedes the earlier edition YD/T 5142-2005; YD/T 5087-2005; YD/T 5036-2005.
