What this standard covers

This standard applies to sparsely populated, low density of mobile users, traffic is low, operation and maintenance of the new difficulties in the remote areas of the 900/1800 MHz TDMA digital cellular mobile communication network wireless network engineering. Expansion, reconstruction project design fully consider the characteristics of the original equipment, rational use of existing facilities, based on the reference implementation of this requirement. Mobile Switching Subsystem (NSS) and GPRS core system design see YD/T 5104-2005 "900/1800 MHz TDMA digital cellular mobile communication network engineering design specifications. "

Document data

International classification (ICS): 33.020.

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 18,155 words.
