What this standard covers

This standard is a special atlas for standardizing the group and combination of pipelines in communication pipeline engineering. It provides a unified pipeline atlas for the construction, design, construction, supervision and maintenance of communication pipelines, so that the communication pipeline engineering drawings can be unified in specifications. The standards are consistent and accurate.

Document data

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 73,778 words.

Supersedes the earlier edition YD/T 5162-2007.
