1 Foreword

YD/T 6116.2-2025 was issued by Ministry of Industry and Information Technology on 17 December 2025 and has been in force since 1 April 2026.

It is one of 6 parts of the YD/T 6116 series.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the capability requirements for key participants and related platforms involved in computing power scheduling within the computing power interconnection system. Key content includes key roles in computing power scheduling, key system platforms for computing power scheduling, and computing power scheduling processes. This standard serves as a reference for computing power providers, computing power internet operators, and computing power schedulers when designing related platform functions and developing computing power scheduling operation processes.

YD/T 6116.2-2025 falls under ICS 35.210, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Other parts of this standard:

YD/T 6116-2024 - Industrial Internet - Campus network - 5G network deployment technical requirements

YD/T 6116.1-2024 - Computing power interconnection capability requirements - Part 1: General framework

YD/T 6116.4-2025 - Part 4: Data Flow

YD/T 6116.5-2025 - Part 5: Computing Power Identification

YD/T 6116.7-2025 - Part 7: Cloud Environment Multi-GPU Unified Development Framework

Standards on related subjects:

GB/T 17969.1-2015 - Information technology -- Open systems interconnection -- Procedures for the operation of OSI registration authorities -- Part 1: General procedures and top arcs of the International Object Identifier tree

GB/T 17143.7-1997 - Information technology. Open Systems Interconnection. Systems Management. Part 7: Security alarm reporting function

GB/T 17143.4-1997 - Information technology. Open Systems Interconnection. Systems Management. Part 4: Alarm reporting function

5 Classification and status

International classification (ICS): 35.210

Chinese Standard Classification (CCS): L 79

Prefix YD/T: recommended standard.
