1 Foreword

YD/T 6119-2024 was issued by Ministry of Industry and Information Technology on 10 December 2024 and has been in force since 1 April 2025.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the northbound interface technical requirements of the industrial Internet edge gateway, including the network element management interface for implementing network functions and the virtualized resource management interface requirements for managing applications and services. This standard is applicable to the interaction and communication between edge gateway nodes and edge clouds, including network configuration, application deployment and lifecycle management.

YD/T 6119-2024 falls under ICS 33.060, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.

3 About this standard

Sector: Telecommunication Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

CJ/T 188-2018 - Technical requirements of utility meters data transmission

YDC 079-2009 - Technical Specifications and Testing Methods of Wireless LAN for Mobile Terminals

YD/T 6116.4-2025 - Computing Power Interoperability Requirements - Part 4: Data Flow

YD/T 6125-2024 - Industrial Internet Identifier Resolution - Technical requirements for authoritative analysis system

YD/T 6126-2024 - Industrial Internet Identifier Resolution - Registration system Technical requirements

5 Classification and status

International classification (ICS): 33.060

Chinese Standard Classification (CCS): L 78

Prefix YD/T: recommended standard.
