YD/T 6537-2025 was issued by Ministry of Industry and Information Technology on 17 December 2025 and has been in force since 1 April 2026.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

## 2 Scope Preview

This standard specifies the basic requirements for 5G base stations supporting lightweight (RedCap) in the sub-6GHz band, as well as other functional requirements such as MIMO enhancement, small packet transmission, and coverage enhancement, and the performance and interface requirements of base station equipment. This standard applies to the research and development, production, and testing of sub-6GHz base station equipment in 5G digital cellular mobile communication networks.

YD/T 6537-2025 falls under ICS 33.060.99, in the field of telecommunications.

This catalogue holds 3,420 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.
