Foreword

YD/T 6672-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 11 March 2026, with effect from 1 June 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.040.50; CCS M42.

1 Scope

YD/T 6672-2026 describes the test methods for the broadband service experience and network performance indicators of industrial manufacturing enterprises. For each indicator of broadband network service experience and network performance, it covers the purpose of the test, the test configuration and the test steps.

The document applies to the assessment and testing of broadband network service experience and network performance indicators for industrial manufacturing enterprises. It is used by manufacturing enterprises, telecommunication operators, network integrators and test laboratories. It is a voluntary standard, as shown by the /T in its code. It was approved by the Ministry of Industry and Information Technology under the China Communications Standards Association, issued on 11 March 2026 and takes effect on 1 June 2026. It is a new standard.
