Foreword

YD/T 6768.3-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 11 March 2026, with effect from 1 June 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 35.240; CCS L67.

1 Scope

YD/T 6768.3-2026 specifies indicator requirements for knowledge computing engine services in the area of knowledge computing and application. The requirements mainly cover reasoning and computation capability and knowledge application capability. This is Part 3 of the series on technical requirements for knowledge computing engines, and it deals with what such a service must be able to deliver when it is used to reason over knowledge and to apply the results.

The document is intended to guide providers of knowledge computing engine services in product research and development. It also serves as a reference for the organizations that use these services, in product selection, system construction and application management. It is a voluntary standard issued by the Ministry of Industry and Information Technology on 11 March 2026 and effective from 1 June 2026. It is a new standard.
