Foreword

YD/T 6772-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.030; CCS M10/29.

1 Scope

The document sets out the technical requirements for telephone number protection services. It covers the definition of the service, the service architecture, platform functions, interface functions, service procedures, network routing, management requirements and security requirements. It applies to the carrying out of number protection service business in China, where a telephone number is protected so that the real number of a user is not exposed to the other party.

It is used by telecommunication operators and service providers that build or run number protection platforms, by equipment suppliers who develop platforms and interfaces for them, and by test and assessment bodies. It is a voluntary standard issued by the Ministry of Industry and Information Technology and both issued and effective on 15 April 2026. It is a new standard.
