### Foreword

YD/T 6783-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 August 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 35.040; CCS L79.

### 1 Scope

This document specifies the test environment and the basic capability test methods for universal integrated circuit cards that act as active identifier carriers. It is part of the series on identification and resolution for the Industrial Internet. It applies to the research and development, testing and certification of such cards in the Industrial Internet identification and resolution system.

Card developers, test laboratories and certification bodies can use it to carry out and compare tests on identifier carrier cards. It is a voluntary industry standard (code with /T). It was approved by the Ministry of Industry and Information Technology, issued on 15 April 2026 and takes effect on 1 August 2026. It is a new standard.
