Foreword

YD/T 6793-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 August 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 01.080.50; CCS L04.

1 Scope

The document specifies technical requirements for the aggregation and integration processing of personal information in the telecommunications and internet industry. It covers the basic principles, the aggregation and integration modes, and the technical requirements. It applies to regulating the processing of user personal information in aggregation and integration scenarios in the telecommunications and internet industry. It is also applicable to supervision, management and assessment of such processing by third-party assessment bodies, industry regulators and similar organizations.

Telecom and internet service operators, third-party assessors and regulators can use it. It is a voluntary industry standard (code with /T). It was approved by the Ministry of Industry and Information Technology, issued on 15 April 2026 and takes effect on 1 August 2026. It is a new standard.
