Foreword

YD/T 6796.2-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 August 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 35.240; CCS L67.

1 Scope

The document specifies the technical requirements for data exchange between the enterprise-side system for managing non-profit internet information services and the supervision side, which consists of provincial-side and ministry-side systems. It is Part 2 of the series and deals with interface requirements. It guides the technical connection between enterprise-side systems, built by licensed telecom businesses such as internet access service providers, mobile application distribution platform enterprises and smart terminal manufacturers, and the supervision-side systems.

Software developers and system integrators working for these enterprises are typical users. It is a voluntary industry standard, as the /T in its code shows. It was approved by the Ministry of Industry and Information Technology, issued on 15 April 2026 and takes effect on 1 August 2026. It is a new standard.
