Foreword

YD/T 6950-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.040; CCS M10.

1 Scope

YD/T 6950-2026 describes general test methods for the API interface between a multi-access edge computing (MEC) platform and an application, known as the Mp1 interface. The tests cover the application enablement API, the bandwidth management service API, the UE identity API, the location service API and the mobility service API.

The document applies to the research, development and testing of the interface between an edge computing platform and its applications. It is used by developers of MEC platforms and edge applications, by telecom operators, by equipment vendors and by test laboratories. It is a voluntary standard, as shown by the /T in its code. It was approved and issued by the Ministry of Industry and Information Technology on 1 June 2026 and takes effect on 1 September 2026. It is a new standard.
