Foreword

YD/T 6966-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 35.020; CCS M11.

1 Scope

This document sets requirements for collecting and sharing transaction information in a public blockchain network security monitoring and analysis system. It is one of a group of documents on monitoring and analysing the security of public blockchain networks, and it deals only with the transaction information handled by such a system.

It applies to the development and application of the transaction information processing function in public blockchain network security monitoring and analysis systems. Developers of monitoring systems, operators of such platforms and organizations that rely on shared blockchain transaction data are the likely users. The standard is voluntary. The Ministry of Industry and Information Technology issued it on 1 June 2026, and it takes effect on 1 September 2026. It is a new standard.
