Foreword

YD/T 6969-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 35.110; CCS M11.

1 Scope

YD/T 6969-2026 sets requirements for collecting and sharing block information in a public blockchain network security monitoring and analysis system. It belongs to a group of documents on the security monitoring of public blockchain networks and covers the block information that such a system handles.

The document applies to the development and application of the block information processing function in public blockchain network security monitoring and analysis systems. System developers, platform operators and security teams that use shared block data can apply it. It is a voluntary standard of the communications industry. The Ministry of Industry and Information Technology issued it on 1 June 2026, and it takes effect on 1 September 2026. It is a new standard.
