Foreword

YD/T 6984-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.040.40; CCS L78.

1 Scope

The document sets technical requirements for enhancing wide area network capability so that it can carry intelligent computing services. The requirements cover the overall architecture, the orchestration and management subsystem, the network management and control subsystem, and protocol capabilities.

It applies to the design, testing and operation and maintenance of wide area networks that carry intelligent computing services. Network operators, equipment suppliers, designers of computing networks and test organizations can use it. The standard is voluntary. The Ministry of Industry and Information Technology issued it on 1 June 2026, and it is effective from 1 September 2026. It is a new standard.
